Power BI assignment – 1

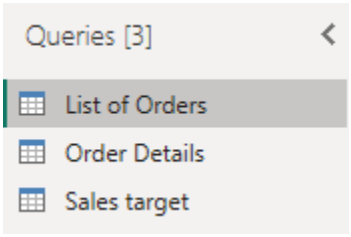

Step 1: I've imported the List of Orders file into PowerBi

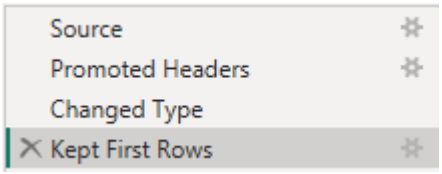

Step 2: I've opened "List of Orders" in Power Query Editor by clicking on 'Transform'.

Step 3: I've imported the "Order Details" and "Sales target" into Power Query Editor.

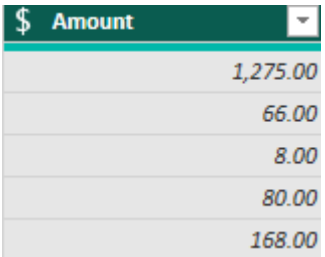

Step 4: Using Power Query's Keep Rows function, I've kept the first 500 rows and removed the remaining.

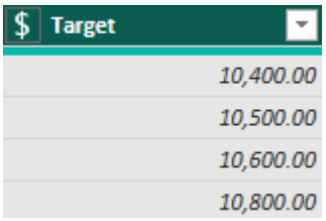

Step 5: I've ensured that the "Order Date" column in the "List of Orders" table is set to data type 'Date'.

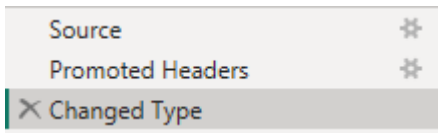

Step 6: I've changed the data type of "Amount" and "Target" columns to 'Fixed Decimal Number'.

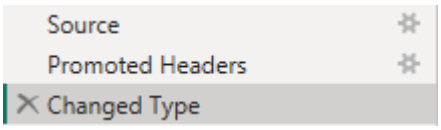

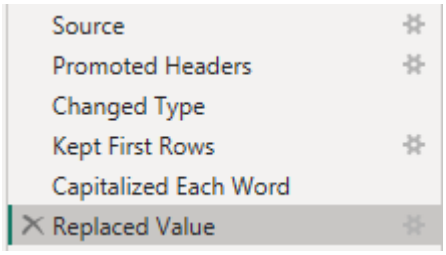

For Amount column

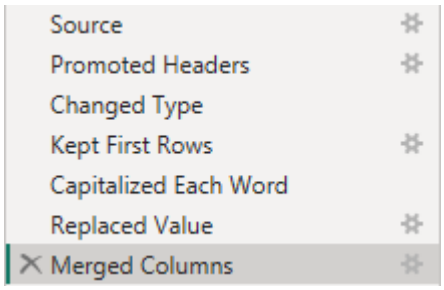

For Target column

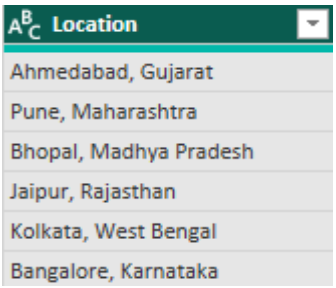

Step 7: I've formatted the "Customer Name" column into proper case, ensuring consistent capitalization for each word. And also, there was a customer name with just the letter "K", I tried to find if there's any evidence to find the name of the customer but I was unable to find it. Hence, I replaced K with Unknown.

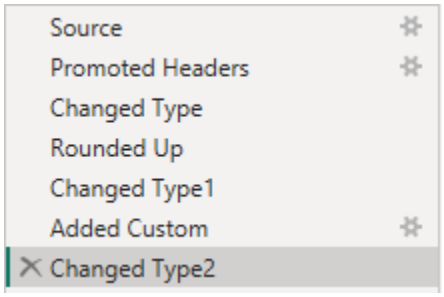

Step 8: Merged the "State" and "City" columns to create a new column named "Location" in the format 'City, State' using the delimiter ", (space)".

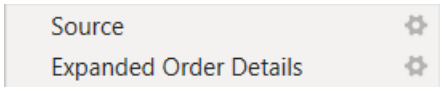

Step 9: Created a new custom column named "Profit Margin" as the percentage of "Profit" divided by "Amount".

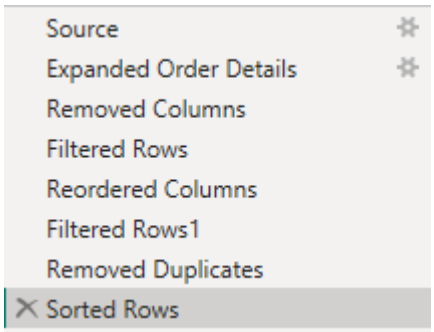

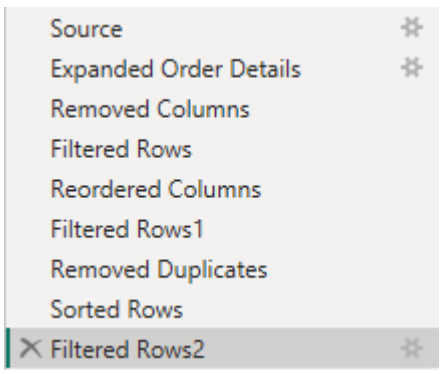

Step 10: Using "Merge Queries as New", I merged the "List of Orders" and "Order Details" tables into a new single table named "Orders Data" based on the "Order ID" relationship.

Step 10: I made a duplicate of the Orders Data, so that I can sort it.

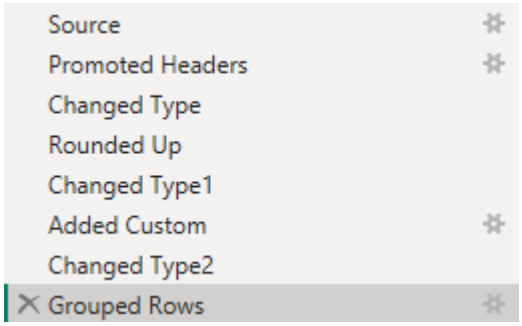

Step 11: I've sorted the orders by Order Date in descending order to analyze recent trends and also filtered the orders to focus only on a specific state (e.g., Tamil Nadu) for regional analysis.

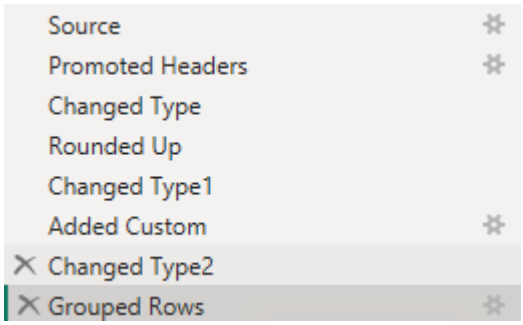

Step 12: I duplicated the “Order Details” table and calculated the count of each Order ID, average profit by category and the total amount by Sub-Category.

Order Count

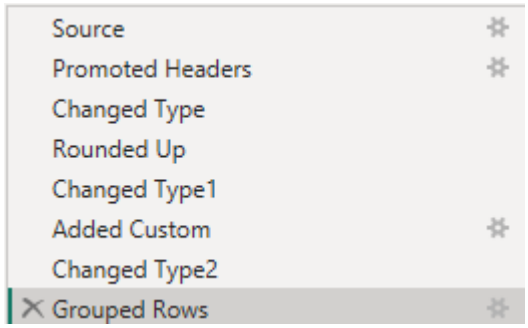

Order ID	Count
B-25601	4
B-25602	5
B-25603	8
B-25604	2

Avg Profit

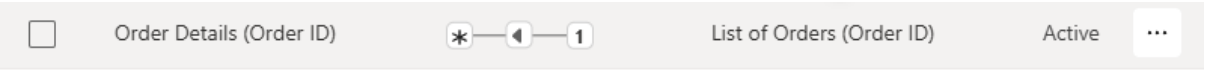

Category	Avg Profit
Furniture	9.456790123
Clothing	11.76290832
Electronics	34.07142857

Amount by Sub-Category

Sub-Category	Total Amount
Bookcases	56861
Stole	18546
Hankerchief	14608
Electronic Games	39168

Step 13: Established a relationship between the “List of Orders” and “Order Details” tables using the ‘Order ID’ column.

Step 14: Built a relationship between the “Order Details” and “Sales Target” tables based on the ‘Category’ column. And ensure this relationship is active by clicking the "Manage relationships" tab.
